Cold Weather Rule

A municipal utility must not disconnect a residential customer during the period between October 15 and April 15 if the disconnection affects the *primary heat source* for the residential unit. To prevent disconnection, contact your provider for a Disconnect Protection Application, as you can be disconnected if you don't contact them. However, water disconnects will continue throughout the winter for non-payment of the utility bills if the water does not affect the primary heat source for the home.
